

US issues travel advisory against Haiti

United States is warning Americans about robbery, lawlessness, infectious diseases and poor medical facilities in Haiti.

The US State Department has issued a revised advisory against travel to the French speaking country which is grappling with a cholera outbreak, while still recovering from a powerful earthquake that killed more than 200,000 people.

Washington said in recent months, visitors have been attacked and robbed, after leaving the airport and at least two US citizens were shot dead in robbery and kidnapping incidents.
